Instructions to Candidates:

- 1) Read all the instructions carefully and write answers.
- 2) Write the question numbers correctly.

SECTION -A

(Work book)

(40)

I. Read the following passage and answer the questions set on it: (5×1=5)

Social institutions, especially the family, strengthen gendered definitions of femininity and masculinity. In earlier times, women were confined to the four walls of the home, immersed in household chores, looking after the husband and children and catering to all their necessities and demands. In fact, the role of a woman within the family was that of an angel by the hearth who created a peaceful heaven away from the husband's hectic work schedule. She was also her children's mother and cared, shared and nurtured. In the process, she was also the repository of all the male stress and tension. She had no legal or social rights, and familial or domestic abuse that could be both physical and/or emotional was rampant.

Feminism questioned such gendered existence. Across the world, the profile of families is changing from 'joint' to 'nuclear' to 'single-parent' family mould. Attitude towards the domestic labour women had to traditionally undertake (unpaid but very necessary for family sustenance) is also changing, since more women are stepping out of the confines of home and becoming economically independent.

1. What were the duties of women in earlier times?
2. Mention any word from the passage which mean's 'about women'.
3. How did men treat women in their households?
4. Name any two types of families found in society.
5. Suggest a suitable title for the passage.

SECTION-B

(Language Component)

(30)

I. Read the following passage and answer the questions given below:

(5×1=5)

One of the most common injuries teenagers and adults experience is a sprained ankle. A sprain occurs when the ligaments of a joint are twisted and possibly torn. Ligaments are bands of stringy fibres that hold the bones of a joint in position. A sprain can occur from a sudden wrenching at the joint, or a stretching or tearing of the fibres of the ligaments. The injured area usually swells and becomes black and blue. Stepping off the sidewalk at the wrong angle or having one foot land in a hole while jogging can leave you rolling on the ground in agony with an ankle on fire! If you cannot walk without experiencing intense pain, you must seek medical help. If the pain is manageable, and you can walk, here are three words to help you remember how to treat yourself:

- i) Elevate
- ii) Cool
- iii) Bandage

As soon as there is injury to that ligament, there will be a certain amount of bleeding under the skin. Once the blood pools around the damaged blood vessels, inflammation and swelling occur. The pressure from the swelling results in additional stress and tenderness to the region. To minimize the degree of swelling, lie down as soon as possible and keep the ankle elevated so that it is actually higher than your heart. Next, to shrink the blood vessels and keep bleeding (hence bruising) to a minimum, apply a cold pack. After 20 minutes, take the pack off, wait half an hour, and then reapply. This can be done several times a day for a total of three days. Never leave a cold pack on for more than 20 minutes at a time. Finally, bandage the ankle. Be careful not to wind it too tightly: doing so can restrict blood flow and cause harm to the entire foot.

Answer the following questions:

1. The main idea of the passage is _____.
 - a) to describe sprains to the ligaments
 - b) to explain how to bandage head injuries.
 - c) to explain how to treat our fractured wrist.
 - d) to explain how the temperature of a wound is important.
2. According to the passage, how is a sprain caused?
3. In which cases, can the ankle be sprained according to the passage?
4. According to the instructions, once the initial cold pack is removed, one has to wait for 30 minutes and then reapply the ice. True/False.
5. It can be understood from the passage that the black-and blue symptom of the sprain is due to _____.

II. Fill each of the blanks with the correct tense form of the verb given in brackets: (5×1=5)

Tom Wilson was an explorer. He had been to nearly every country in the world, but the most exciting time he ever__ (have) was when he _____(go) to the Congo Jungle. A magazine ____ (ask) him to retrace the route of a famous explorer who _____ (have +disappear) in the 1920s as he_____ (follow) a small river he got separated from his guides.

III. Do as Directed:

1. Choose the correct synonym for the word given below: (1)
Link (connect, separate)
2. Choose the correct antonym for the word given below: (1)
Deny (oblige, refuse)
3. Add suitable affixes to the words given tin brackets and fill in the blanks: (2)
The final round of the _____(champion) will be in Japan. The players will be ____ (happy) if team loses it.
4. Write a suitable homophone for the word 'site'. (1)

[P.T.O.]

IV. Frame questions to get the underlined word/s as the answer: (3×1=3)

1. a) The boy came to buy some fish.
 - b) The flower pot fell on the floor.
 - c) The students greet the teacher in the class.
2. Add suitable question tags to the following sentences: (2×1=2)

- a) The guests will not be late, _____.
- b) The girl went to the school, _____
